

Subject Index to Volume 8—1986

- Actinomyces israelii*, phosphate utilization by, 4:8
Actinomyces naeshlundii, phosphate utilization by, 4:8
 Alcohol immersion, ultraviolet light sterilization with, 2:10
 Alcohol wiping, ultraviolet light sterilization compared with, 2:10
 Anti-inflammatory drugs, dentin hypersensitivity and, 3:14
 Antimicrobial effect, of zinc sulfate/ascorbic acid mouthrinse, 6:5
 Antiplaque dentifrice, effect on plaque accumulation and gingival health, 5:12
 Arginine-urea mixture, modification of plaque by, 1:7
 Ascorbic acid. *See* Zinc sulfate/ascorbic acid mouthrinse
 Assessment, of patients undergoing radiotherapy, 3:24
 Bitewing radiographic examinations, use of OHI-S as selection criterion in, 6:13
 Calculus deposits, effect of soluble pyrophosphate and sodium fluoride on, 3:5
 Cancer, patients undergoing radiotherapy for, pretreatment assessment and treatment of, 3:24
 Carbohydrate-reduced diet, effects on development of gingivitis, 6:17
 Caries
 oral hygiene index-simplified, interproximal caries and, 6:13
 reduction in, school-based fluoride mouthrinsing program and, 5:19
 Casting, macro-retentive, 1:11
 Class II composite restorative technique, 5:16
 Delton sealant, retention, marginal integrity, and color stability of, 5:9
 Demineralization, effect of glycyrrhizin on, 2:5
 Dental behavior, assessing perceptions of, 2:27
 Dental school, older patients and, 4:20
 Dentifrice
 antiplaque, effect on plaque accumulation and gingival health, 5:12
 containing soluble pyrophosphate and sodium fluoride, effect on calculus deposits, 3:5
 Dentin
 hardness and solubility of, irradiation effects on, 4:4
 hypersensitivity of, desensitizing agents and, 3:14
 Dentures
 evaluation of edentulous patient and, 6:24
 fixed partial, immediate provisional, 1:23
 leukoplakia of palate and, 3:19
 Denture stomatitis, effect of antiseptic mouthrinses on, 5:3
 Desensitizing agents, 3:14
 Diet, effects on development of gingivitis, 6:17
 Edentulous patient, evaluation of, 6:24
 Elderly patients, at dental school, 4:20
 Enamel
 effect of glycyrrhizin on fluoride uptake and demineralization in, 2:5
 hardness and solubility of, irradiation effects on, 4:4
 Equilibration techniques, indications for, 4:24
 Ethical obligations, 1:16
 Fissure sealant, light-cured, retention in tropical environment, 3:11
 Fixed partial denture, immediate provisional, 1:23
 Fluoride
 effect on calculus deposits, 3:5
 enamel and dentin pretreated with, effects of irradiation on hardness and solubility of, 4:4
 uptake of, effect of glycyrrhizin on, 2:5
 Fluoride mouthrinsing program, posttreatment benefits of, 5:19
 Fordyce granule, actively secreting, 2:24
 Forensic dentistry, 1:16
 Gingival health, effect of Blendax on, 5:12
 Gingival Index (GI), modification of, 1:3
 Gingival inflammation, zinc sulfate/ascorbic acid mouthrinse and, 6:5
 Gingivitis
 effect of carbohydrate-reduced diet on, 6:17
 evaluation of clinical changes in, 1:3
 zinc sulfate/ascorbic acid mouthrinse and, 6:5
 Glycyrrhizin, effect on fluoride uptake and demineralization, 2:5
 Handpieces, comparison of sterilization methods for, 2:10
 Helioseal, retention in tropical environment, 3:11
 Irradiation, effects on enamel and dentin pretreated with fluoride, 4:4
 Legal obligations, 1:16
 Leukoplakia, of palate, 3:19
 Listerine Antiseptic
 effect on microbial flora and denture stomatitis, 5:3
 following periodontal flap surgery, 4:14
 Macro-retentive casting, 1:11
 Malignant hyperthermia, treatment of patients susceptible to, 1:27
 Mandibular midline
 as point of reference, 5:24
 relationship with maxilla, 4:24
 Maxillary midline
 as point of reference, 5:24
 relationship with mandible, 4:24
 Microbial flora, effect of antiseptic mouthrinses on, 5:3
 Modified Gingival Index (MGI), 1:3
 Motivation, of patients, 2:27
 Mouthrinse
 antiseptic, effect on microbial flora and denture stomatitis, 5:3
 zinc sulfate/ascorbic acid, clinical effectiveness of, 6:5
 Nonsmokers, toothbrushing sequence in, 2:17
 Nystatin oral suspension, effect on microbial flora and denture stomatitis, 5:3
 Occlusal equilibration, use criteria for, 4:24, 5:24
 Odontology, in forensic sciences, 1:16
 Oral hygiene index-simplified (OHI-S), as selection criterion in bitewing radiographic examinations, 6:13
 Palate
 inflammation of, effect of antiseptic mouthrinses on, 5:3
 leukoplakia of, 3:19
 Perception(s), of dental behavior, assessing, 2:27
 Periodontal dressing, following periodontal flap surgery, 4:14

- Periodontal flap surgery, comparison of Listerine mouthwash and periodontal dressing following, 4:14
- pH, of plaque, modification by arginine-urea, 1:7
- Phosphate utilization, by *Actinomyces israelii* and *Actinomyces naeslundii*, 4:8
- Plaque
effect of Blendax on, 5:12
effect of carbohydrate-reduced diet on, 6:17
modification by arginine-urea, 1:7
zinc sulfate/ascorbic acid mouthrinse and, 6:5
- Polyamine formation, in plaque, modification by arginine-urea mixture, 1:7
- Porcelain-fused-to-metal prosthesis, salvaging, 3:22
- Prisma-Shield, retention, marginal integrity, and color stability of, 5:9
- Prosthesis, porcelain-fused-to-metal, salvaging, 3:22
- Protein precipitants, dentin hypersensitivity and, 3:14
- Pyrophosphate, soluble, effect on calculus deposits, 3:5
- Radiotherapy, pretreatment assessment and treatment of patients undergoing, 3:24
- Restoration(s), class II composite, 5:16
- Salivary flow rate, compromised, care for patients with, 2:15
- Sealant(s)
Delton, retention, marginal integrity, and color stability of, 5:9
tubule, dentin hypersensitivity and, 3:14
- Sickle cell anemia patient, dental management of, 2:21
- Smokers, toothbrushing sequence in, 2:17
- Sodium fluoride. *See* Fluoride
- Splint therapy, use criteria for, 4:24, 5:24
- Sterilization methods, comparison of, 2:10
- Stomatitis, denture. *See* Denture stomatitis
- Temporomandibular joint syndrome, equilibration and splint therapy in, 4:24, 5:24
- Toothbrushing sequence, in smokers and nonsmokers, 2:17
- Trauma, to oral tissues, medico-legal implications of, 1:16
- Tubule occluding agents, dentin hypersensitivity and, 3:14
- Tubule sealants, dentin hypersensitivity and, 3:14
- Ultraviolet light sterilization, compared with alcohol methods, 2:10
- Urea. *See* Arginine-urea mixture
- Water, effect on microbial flora and denture stomatitis, 5:3
- Zinc sulfate/ascorbic acid mouthrinse, clinical effectiveness of, 6:5
